

MegaFlex™

Modular Distribution System Architecture

- » Economical
- » Flexible
- » Space-efficient design
- » Easily upgraded
- » Expandable to 15 modular cabinets

Product Overview

Celerity's MegaFlex™ uses a modular approach to offer the most flexible, cost effective solution for chemical and slurry applications. The MegaFlex architecture accommodates all of the Mega Systems™ current product processes but with a reduced footprint. Cabinets are front entry only with slide out panels for easy access. This feature also allows for streamlined upgrades through module replacement. A centralized PLC architecture allows for plug-and-play module recognition that reduces retrofit installation time. Each MegaFlex cabinet can be mated side-to-side, back-to-back or standalone to accommodate a large variety of room layouts.

Features

- Customer driven design
- Versatile configuration
- Easily upgraded and maintained
- Distributed control system architecture
- Front access only cabinets
- Internal chemical resistant lighting
- Channeled drains
- Removable doors
- Adjustable exhaust channels

Controls

- Allen-Bradley series PLC
- Allen-Bradley PanelView™ series operator interface
- Connectivity to MegaView™ Supervisory System via DH+ or Ethernet
- Local and Remote EMO capabilities
