

Contract Manufacturing Services

High-purity chemical process equipment

- Design and engineering services for components and systems for a wide range of processes, applications and chemistries
- Point-of-use and tool integrated designs
- Extensive experience with many materials and suppliers, especially plastics, ensuring compatibility with specific applications and chemistries
- CNC and manual machining for high precision manufacturing and consistency
- Highly skilled fabricators capable of bead and extrusion welding ensuring strong, accurate and clean welds for product durability
- Multiple plumbing material options include high-purity Teflon® PFA and stainless steel
- Purebond®, socket fusion and stainless steel orbital welding
- Electrical integration, final assembly and test operations per customer specifications
- Class 100 through Class 10,000 clean-rooms for assembly of high-purity components
- Quality control to ensure zero defects in workmanship and materials
- Global service and support on Celerity equipment
- R&D in alignment with customer product roadmaps
